In This Asset

This asset is in two parts:
-Unity Project (Game Client and Game Server)
-NodeJS Web API (Optional, for User Login and User Data)

You can run the project from any scene to run the game in Test Mode. Follow the instructions in the doc to install the server and use online features.

Licence

All assets in this package are governed by the Unity Asset Store EULA
https://unity3d.com/legal/as_terms

Summary
You are allowed to use this package in your commercial game.
You are NOT allowed to distribute or sell the source code, individual assets and files.
You are allowed to distribute or sell the compiled executable created using these assets.

However, a few third-party assets, have a different licence.
All files in folder: Fonts
